

SRI KRISHNA COLLEGE OF TECHNOLOGY

An Autonomous Institution, Approved by AICTE and
affiliated to Anna University

Accredited by NAAC with “A” grade

Coimbatore, Tamil Nadu

DEPARTMENT OF INFORMATION TECHNOLOGY

LAB RECORD

REGULATION 2023

Course Code	:	23CS502
Name of the Course	:	Software Testing
Class	:	III IT ‘F’
Semester	:	V
Academic Year	:	2026 - 2027

SRI KRISHNA COLLEGE OF TECHNOLOGY

An Autonomous Institution, Approved by AICTE and
affiliated to Anna University

Accredited by NAAC with “A” grade

Coimbatore, Tamil Nadu

DEPARTMENT OF INFORMATION TECHNOLOGY

23CS502 – SOFTWARE TESTING

CONTINUOUS ASSESSMENT RECORD

BONAFIDE CERTIFICATE

This is to certify that this record is the bonafide record of work done by Mr./Ms. _____
during the academic year 2026 - 2027.

Faculty In-charge

Head of the Department

Submitted for the University practical examination held on _____

INTERNAL EXAMINER

EXTERNAL EXAMINER

PROGRAMME OUTCOMES:

Engineering Graduates will be able to:

- **PO1. Engineering knowledge:** Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.
- **PO2. Problem analysis:** Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and
- engineering sciences.
- **PO3. Design/development of solutions:** Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health
- and safety, and the cultural, societal, and environmental considerations.
- **PO4. Conduct investigations of complex problems:** Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to
- provide valid conclusions.
- **PO5. Modern tool usage:** Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modeling to complex engineering activities with an
- understanding of the limitations.
- **PO6. The engineer and society:** Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to the professional
- engineering practice.
- **PO7. Environment and sustainability:** Understand the impact of the professional engineering solutions in societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development.
- **PO8. Ethics:** Apply ethical principles and commit to professional ethics and responsibilities and norms of the engineering practice.
- **PO9. Individual and team work:** Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.
- **PO10. Communication:** Communicate effectively on complex engineering activities with the engineering community and with society at large, such as, being able to comprehend and write effective reports
- and design documentation, make effective presentations, and give and receive clear instructions.
- **PO11. Project management and finance:** Demonstrate knowledge and understanding of the engineering and management principles and apply these to one's own work, as a member and leader in a team, to manage
- projects and in multidisciplinary environments.
- **PO12. Life-long learning:** Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change.

PROGRAMME EDUCATIONAL OBJECTIVES (PEO'S):

- **PEO 1:** Graduates will have a profound knowledge in the various programming languages and possess globally competent skill sets by inculcating continuous up gradation of their technical skills and personality traits.
- **PEO 2:** Graduates will be able to analyze and find solutions to various applications and reconcile the dynamic trends in the field of Information Technology.
- **PEO 3:** Graduates will contribute to the society by their ethical behavior and effective teamwork.
- **PEO 4:** Graduates will excel with different skills like effective communication, leadership qualities, and provide smart solutions in business environment.

PROGRAMME SPECIFIC OUTCOMES:

- **PSO 1:** Graduates will demonstrate multidisciplinary knowledge for problem solving by creating solutions for product based and application-based software for the advancement of the society.
- **PSO 2:** Graduates attain advance knowledge in Information and Communication Technologies (ICT) thereby creating real time solutions for different projects by using modern tools prevailing in the current trends.
- **PSO 3:** Graduates will exhibit state of the art technologies by applying their knowledge in various programming skills to overcome the demand of sustainable development.

COURSE OBJECTIVES

1. To provide students with an understanding of core testing concepts.
2. To learn both functional and non-functional testing.
3. To understand the different types of user acceptance testing and end-to-end testing.
4. To become familiar with the best practices of testing.

COURSE OUTCOMES

- **CO1:** Plan and apply the appropriate level of testing within the context of a software development application to the satisfaction of its beneficiaries. [AP]
- **CO2:** Analyze specific and measurable test cases to ensure coverage and traceability to requirements. [A]
- **CO3:** Understand the problem of reporting techniques, metrics, and testing status reports, and communicate testing results to colleagues, managers, and end users. [U]
- **CO4:** Apply testing models, processes, and practices appropriate for the software development lifecycle model of a project. [AP]
- **CO5:** Apply principles and practices of test-driven development to improve testing quality and reduce delivery times. [AP]
- **CO6:** Inspect the various testing processes towards the continuous delivery of a software product. [A]

TABLE OF CONTENTS

S.NO	NAME OF THE EXPERIMENT	PAGE NO
1.	Develop a program to automate the login process for a specified webpage using Selenium.	
2.	Write an automation script using Selenium to handle form elements on a given website.	
3.	Create an automation script with Selenium to interact with specific web elements on a designated webpage.	
4.	Implement automation scripts using TestNG, prioritizing different test cases for efficient testing on a given website.	
5.	Develop automation scripts with TestNG, incorporating seven levels of logging for detailed analysis while testing a specified website.	
6.	Execute application tests using designed test cases and generate an HTML report for a comprehensive overview.	
7.	Design and implement a hybrid framework for a ticket booking system, along with associated test cases.	
8.	Develop a hybrid framework and associated test cases for a hotel room booking system.	
9.	Design and develop a hybrid framework and relevant test cases for a hospital appointment application.	
10.	Implement a hybrid framework and associated test cases for an e-commerce application.	
11.	Develop a hybrid framework and design test cases for comprehensive testing of an insurance website.
